D.V.U.S.D. Maintenance

Don;

I would like to thank you for coming out and showing the maintenance staff your Extension ladder anti-fall device. I was quiet impressed with the thought and time spent in making your product; the materials used in manufacturing are well beyond any spec for such a product.

We have purchased one of your units, and I'm pleased to tell you that it works great. The ease in set up was a big seller to me, as well as it helps to make others fell safe in using the extension ladder. The device holds the ladder to the roof fairly securely, and has little to no movement once set up.

I believe that your device should be used by anyone who uses an extension ladder on a daily basis. The cost of your device outlays the cost of medical bills, or workers comp claims from a fall off a ladder.

Once again Thank You !!!!

Respectfully;

Shawn McAdams
